

AGROLOGCO

AGRICULTURAL & INDUSTRIAL

Logistics Solutions

Liberia | Côte d'Ivoire

— Company Overview —

AgroLogCo is a West Africa-focused logistics company providing **reliable, disciplined, and technology-enabled transport solutions** for agricultural commodities and industrial freight. The company is structured to serve producers, processors, exporters, and institutional clients operating across Liberia and Côte d'Ivoire, with a particular emphasis on agricultural value chains and port-linked logistics corridors.

AgroLogCo was established to meet a persistent market need: **dependable logistics execution in challenging operating environments**, where infrastructure constraints, cargo sensitivity, and time-critical delivery require more than ad-hoc trucking capacity. The company combines **regional operating experience**, structured processes, and modern fleet oversight to support consistent service delivery.

AgroLogCo operates as a **professional transport operator**, not a brokerage, and is positioned for long-term partnerships rather than transactional movements.

— Geographic Focus & Operating Corridors —

Liberia

- ✓ Inland agricultural zones to Monrovia port corridors
- ✓ Industrial and agro-processing supply routes

Côte d'Ivoire

- ✓ Inland agricultural and industrial zones to Abidjan port corridors
- ✓ Cross-border and domestic haulage aligned with export flows

The company's routing strategy prioritizes:

- **01** Inland-to-port movements
- **02** Factory-to-port and port-to-yard operations
- **03** Repetitive, contract-based corridors that benefit from operational familiarity and discipline

Core Services

Agricultural Commodity Transport

AgroLogCo provides dedicated transport solutions for bulk agricultural commodities, with operating practices adapted to crop-specific handling requirements. Services support both smallholder aggregation and industrial-scale movements.

Rubber Logistics (Specialty Focus)

The company has a specialized focus on **natural rubber logistics**, including:

Transport of feedstock and processed rubber

Coordination with processing facilities and export timelines

Moisture-sensitive cargo handling awareness

This specialization reflects deep familiarity with rubber supply chains in Liberia and Côte d'Ivoire.

Container Haulage & Port Logistics

AgroLogCo supports containerized cargo movements, including:

- ✓ Full container load (FCL) transport
- ✓ Empty container repositioning

- ✓ Port, yard, and warehouse movements
- ✓ Coordination with terminal operators, customs processes, and shipping schedules

The company emphasizes punctuality, documentation discipline, and port-interface reliability.

Operating Philosophy & Standards

AgroLogCo's operations are guided by **structure, accountability, and risk awareness**. The company emphasizes consistency over scale and reliability over volume growth.

Key operating principles include:

Fleet Oversight & Visibility

GPS-enabled fleet monitoring and centralized dispatch oversight to ensure route compliance and visibility.

Preventive Maintenance Discipline

Maintenance planning designed to reduce breakdown risk and service disruption.

Driver Safety & Route Discipline

Clear expectations around safety, operating conduct, and adherence to approved routes.

Cargo Handling Standards

Awareness of commodity-specific risks, particularly for agricultural and rubber cargo.

Port & Yard Coordination

Structured interaction with port operators, yards, and warehouses to minimize dwell time and delays.

Clear Communication & Escalation

Defined communication channels for clients and partners, with prompt issue escalation when required.

These standards are designed to align with the expectations of **exporters, processors, financial institutions, and port authorities**.

Heritage & Continuity

AgroLogCo builds on a **multi-decade logistics heritage in Liberia**, tracing our legacy to transport operations established in the 1960s under the YES Transport Service group founded by regional logistics pioneer William Thomas "Tommy" Bernard.

While AgroLogCo operates as a modern, independent company, this lineage reflects:

- ✓ Long-standing familiarity with West African transport realities
- ✓ Generational knowledge of logistics execution in challenging environments
- ✓ A culture that values reputation, reliability, and long-term relationships

The company integrates this heritage with modern fleet management, technology, and professional governance standards.

Governance & Leadership Oversight

AgroLogCo is led and overseen by professionals with deep experience in **agribusiness, logistics-dependent industries, and cross-border operations** in West Africa.

Leadership oversight emphasizes:

The company is structured to support **institutional engagement**, including banking relationships, port operations, and long-term service agreements.

Clients & Partnerships

AgroLogCo serves and partners with:

- ✓ Agricultural producers and processors
- ✓ Exporters and trading companies
- ✓ Industrial operators
- ✓ Port-linked supply chains
- ✓ Institutional and project-based clients

The company favors **contractual, repeat engagements** over spot movements, allowing for better planning, service quality, and risk control for all parties.
